ABOUT THE WINERY

Jan Klimeš has created the 0% ABV alternative beverage for the natural wine world. He crafts naturally sparkling soft drinks made with birch sap and encapsulated maceration ingredients including seeds, flowers, berries and more. A gradual process of lactic fermentation after bottling (think pet-nat) creates a naturally carbonated drink. There is no added water, sugar, preservatives or artificial colors. The beverages are unpasteurized and unfiltered.

Jan is pioneering a new category of non-alcohol beverage and quickly inspiring a producers around the world to create their own lacto-fermented zero-alcohol sparkling beverages. He works closely with famed Czech natural winemakers Milan Nasterac and Dluhe Grefty--and even makes cuvees with their grape-skins.
